Summary of Qualifications Results-driven Senior UX Designer with over a decade of experience crafting intuitive, user-centered digital solutions. Adept at leading the full design lifecycle, from research and strategy to high-fidelity prototyping and usability testing. Extensive experience in SaaS and B2B environments, designing scalable and impactful enterprise applications. Passionate about user advocacy, design systems, and driving cross-functional collaboration to align user needs with business objectives. Proven leadership in mentoring designers and influencing design strategy in agile environments.

## Professional Experience

SynapseMX  
Senior UX Designer  
September 2024 - June 2025

- Leading UX design for an advanced maintenance management platform, collaborating with product leaders and developers to enhance usability and functionality.
- Conducting user research, synthesizing insights, and translating findings into wireframes, prototypes, and high-fidelity UI designs.
- Developing and maintaining design systems to ensure consistency across web and mobile applications.
- Partnering with engineers to implement and refine interfaces, ensuring alignment with user needs and technical constraints.

Dell Technologies  
Principal Interaction/Visual Designer  
November 2021 - February 2024

- Designed enterprise-grade IT management software, optimizing user flows and interaction models for complex workflows.
- Led usability testing and voice of customer (VOC) research to validate design decisions and enhance product adoption.
- Established and maintained a scalable design system, ensuring UI consistency and efficiency across multiple products.
- Collaborated with product managers and engineers in an agile environment to deliver impactful and user-friendly solutions.

General Motors  
Senior UX Designer  
November 2020 - October 2021

- Designed and refined automotive industry applications, ensuring seamless user experiences across platforms.
- Conducted extensive usability testing and stakeholder interviews to improve workflows and address user pain points.

- Created interactive prototypes and collaborated closely with engineers to bring designs to life efficiently.

#### Assurant

Senior UX Designer

November 2019 - September 2020

- Defined and implemented intuitive UI solutions for customer-facing applications, enhancing usability and accessibility.
- Developed and tested prototypes, leveraging user feedback to iterate and improve digital experiences.
- Worked closely with cross-functional teams to align design with business objectives and technical feasibility.

#### Honeywell International

Senior UX Designer

September 2016 - November 2019

- Led UX design for Honeywell's industrial software solutions, improving operational efficiency for enterprise users.
- Developed and maintained a scalable design system, streamlining interface consistency across multiple products.
- Conducted user research and usability testing to refine product experiences based on real-world insights.
- Partnered with product managers, engineers, and researchers to drive user-centered design strategies.

#### Northrop Grumman

Senior UX Designer

March 2014 - September 2016

- Designed and improved interfaces for complex government applications, ensuring compliance with accessibility standards.
- Led usability research efforts, identifying opportunities to enhance user workflows and interactions.
- Created design guidelines and prototypes, working closely with developers to implement effective solutions.

## Education

Bachelor's of Science Degree

Mercer University School of Engineering

Macon, GA

## Key Skills

- UX Strategy & Leadership: Experienced in leading UX initiatives and mentoring designers.
- Prototyping & Testing: Expertise in creating interactive prototypes and conducting user testing.
- Cross-Functional Collaboration: Strong background in working with product, engineering, and research teams.
- Design Systems: Skilled in developing and evolving scalable design systems.
- User-Centered Design: Adept at leveraging research and usability testing to inform design decisions.
- Tools: Figma, Sketch, Adobe XD, Axure, and usability testing platforms.
