

Joseph Leonard

UX Designer

Cary, North Carolina

joseph.leonard@outlook.com

<https://kiwiuxdesign.com>

Summary of Qualifications

Results-driven UI/UX Designer with 10+ years of experience crafting intuitive, user-centered solutions for enterprise and B2B platforms. Proven expertise in designing complex dashboard interfaces, cloud management systems, AI-enhanced applications, and scalable enterprise applications. Skilled at translating technical concepts into usable interfaces while collaborating with cross-functional teams including product managers, architects, and engineers. Experienced in leading full design lifecycles from user research to high-fidelity prototyping, with a strong focus on design systems and accessibility standards.

Professional Experience

Lenovo

Senior UX Designer

September 2025 - Present

- Lead UX design for multi-platform AI prompt application with AI-enhanced features, collaborating with product managers and engineering teams to deliver innovative AI-native experiences
- Conduct comprehensive UX research and usability studies to measure key metrics, informing iterative design improvements and feature prioritization
- Implement scalable design system for large-scale consumer application across multiple platforms, ensuring consistency and efficiency
- Partner closely with product, management, and engineering teams to introduce new features and enhancements based on user feedback and research-driven insights

SynapseMX

Senior UX Designer

September 2024 - June 2025

- Lead UX design for enterprise maintenance management platform, creating dashboard-heavy interfaces that present complex operational metrics and alerts in actionable formats
- Conduct comprehensive user research and usability testing with enterprise stakeholders, translating insights into wireframes, user flows, and interactive prototypes
- Develop and maintain scalable design systems ensuring cross-product consistency and alignment with enterprise standards
- Collaborate closely with front-end developers and product teams in agile sprints to ensure design feasibility and technical alignment

Dell Technologies

Principal Interaction/Visual Designer

November 2021 - February 2024

- Designed enterprise-grade IT management software and cloud platform interfaces, optimizing complex workflows for technical users
- Led usability testing and voice of customer research with enterprise clients, validating design decisions for B2B SaaS platforms
- Established comprehensive design systems supporting multiple products, implementing atomic design principles and front-end collaboration workflows
- Collaborated with product managers, engineers, and domain experts to deliver scalable solutions for complex enterprise systems

General Motors

Senior UX Designer

November 2020 - October 2021

- Designed automotive industry applications with focus on operational dashboards and administrative consoles
- Conducted extensive usability testing and stakeholder interviews to optimize workflows for technical users
- Created interactive prototypes for complex system interfaces, working closely with engineering teams for seamless implementation

Assurant

Senior UX Designer

November 2019 - September 2020

- Defined intuitive UI solutions for customer-facing enterprise applications, ensuring WCAG accessibility compliance
- Developed and tested responsive prototypes for web-based applications, leveraging user feedback for iterative improvements
- Collaborated with cross-functional teams to align design solutions with business objectives and technical constraints

Honeywell International

Senior UX Designer

September 2016 - November 2019

- Led UX design for industrial software solutions and monitoring platforms, creating interfaces for complex operational metrics and automation workflows
- Developed scalable design systems streamlining interface consistency across enterprise product portfolios
- Conducted user research with technical stakeholders, translating complex infrastructure concepts into usable dashboard interfaces
- Partnered with product managers, engineers, and domain experts to drive user-centered design for enterprise platforms

Northrop Grumman

Senior UX Designer

March 2014 - September 2016

- Designed interfaces for complex government enterprise applications, ensuring compliance with accessibility standards (WCAG)
- Led usability research for technical platforms, identifying opportunities to enhance workflows for specialized user groups
- Created comprehensive design guidelines and prototypes, collaborating with developers to implement effective enterprise solutions

Education

Bachelor of Science Degree

Mercer University School of Engineering
Macon, GA

Key Skills

Design Expertise:

- Enterprise UI/UX Design
- AI/ML Application Design
- Dashboard Design
- B2B/SaaS Platforms
- Design Systems
- User-Centered Design

Technical Collaboration:

- Cross-functional teamwork with product managers, architects, and engineers
- Front-end development collaboration
- SAFe Agile methodology

Tools & Platforms:

- Figma
- Sketch
- Adobe XD
- Axure
- Storybook
- Interactive Prototyping
- Usability Testing Platforms

Specializations:

- AI-enhanced applications
- Complex enterprise systems
- Cloud platform interfaces
- Administrative consoles
- Data visualization
- Accessibility standards (WCAG)
- Responsive design

- Multi-platform design

Research & Testing:

- User research
- Usability studies
- Metrics-driven design
- Stakeholder interviews
- Voice of customer research
- Design validation
